

## Column Mount Practice Backstop

An innovative new backboard system designed to mount a 3/4 size fan-shaped backboard and ring to an exposed flange of a straight column or sloped rigid frame. Ideal as a training or practice backstop on the side of the main court or for junior players in school multi purpose halls.

Like international FIBA systems, this is a "direct mount" design where the goal bolts through the backboard onto the support structure.

- Will mount onto any column up to 380mm wide and maximum of 12 degrees or 1:4.5 slope.
- 250mm projection.
- Standard 3/4 size Essential High Tensile moulded fibreglass backboard finished in a hard wearing gel coat.
- Standard essential fixed goal and net.
- Can be mounted at any height.
- Can be upgraded with our AAG height adjustor systems so then you can change the ring height from senior to junior heights and anywhere in between.
