

## Essentials Roof Mount Basketball

HiTech Sport's Essentials Basketball range is an economical version of the international level systems used in big stadiums.

Designed for use in schools, small community centres and other venues where top line product is not required, the Essentials range has been engineered to allow flexibility in installation and a quality product at a lower cost.

Essentials products do not come with a wide range of upgrade options. They include heavy duty steel masts (no other colour options), a full size fibreglass backboard (as opposed to basic timber boards which give variable rebound), and fixed ring which is directly mounted to the central mast for maximum strength. Upgrades such as spring loaded rings, backboard padding, height adjustment, safety straps may not be available. Please note procure are indicative only.

Essentials systems can be configured as either forward or rearward folding structures and can be supplied with manual or electric winches. Please note the systems must be installed on steel beams already in place by others. Maximum mounting height is 8 m

**Product Code:**            **BB-ESR**

*Current 1 May 2010*
