## FIBA Certified Basketball—Stadia

HiTech Sports supply a comprehensive range of FIBA certified Basketball systems, tested and approved by the international governing body in Switzerland to be used in all competition including Test Match international level.

All systems are custom made and available in a wide range of powder coated colours as required. All systems come complete with protective safety backboard padding (again in a wide range of colours), a 180 degree spring loaded ring, armoured glass backboard with lifetime warranty, and dual key electric safety winch with auto height cut-outs, and 2 key operation to eliminate the risk of motor burn out.

Unless logistics prevents, systems are fully welded out of heavy gauge steel, and all are supplied with a mechanical, steel 3rd brace arm to lock the structure in play when in use rather than rely on gravity alone.

The Y frame design is sleek and aesthetic, but provides a solid foundation for the structures, as the higher the roof gets, the wider the attachment platform is to ensure it remains stable. This is a dramatic variation to basic systems that maintain a constant 1800 mm base, regardless of the height of attachment.

Systems are supplied with a certificate of international approval, and different designs can be configured to suit almost any facility.
