Essentials Dividing Curtain

The HiTech Essentials dividing curtain is a "traditional" style system, but with many Improvements designed to increase the durability and lower the maintenance requirements.

Essentials curtains can mount on purlins or structural members, but do not require a specific beam. All are supplied with safety key operated electric winch with height limit settings. Winches include switchgear with dual key system so motors can not be reversed and burned out. Safety break arrestors are standard.

Systems include heavy rip stop vinyl base, and a coated mesh upper instead of netting to increase durability. The pick up cables are aircraft grade steel as opposed to nylon cord so they do not stretch and can not easily be cut. The retraction mechanism is a simplified top axle and spool arrangement, eliminating complicated cable runs and the need for multiple pulleys which are high maintenance.
