

## Stadia Dividing Curtain

The HiTech Stadia dividing curtain range is the most advanced system currently available in the world.

The Centre Roll system is completely free of troublesome retractor cables, meaning the curtain is sleek, clean and without trip points in comparison to older designs.

The curtain retracts onto a centre roll, and at twice the speed of comparable models, and the motor is full concealed within the curtain adding to the aesthetic appeal. The system is equipped with a safety break, thermal motor cut out and dual key winch operation to prevent burnout if direction is immediately changed. Once retracted, it stores more compactly than any other system available.

These systems can be mounted to a structural beam or off purlins as required.

They are extremely low maintenance and a wide range of colours are available both in rip stop vinyl, and in vinyl coated mesh for the transparent section.
