

ALULINE MULTI-PURPOSE GOAL

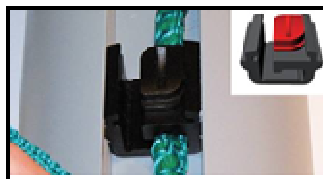

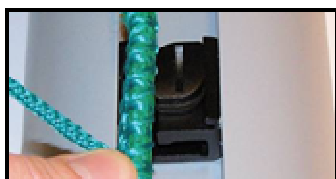

A high quality multisport goal for use indoors and out.

Made from regulation 80 mm square aluminium, the goals are rustproof, light and easy to handle.

The sides fold in so the goal can be stored flat for maximum space efficiency, and can be used for competition Futsal, Handball and Hockey.

The bottoms of the post include a rubber overlay to protect the surface, and to provide additional friction to minimise movement of the goal.

The system incorporates a sturdy safety net locking mechanism that is recessed inside the goal profile so it can't catch players who bump the goal. Designed to be operated with only a standard 10 or 20c coin, the system locks the net into place so it can never accidentally spring loose.

Goals feature regulation white powder-coated finish, and specially made anchors are available on request.
