

Revised 27.11.10

## Aluline International Goals

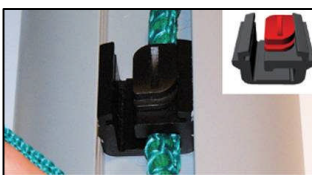

In the late 1990's we introduced the first custom extruded aluminium Safety Football goals to Australia. Over the past decade, these goals have been widely used in council, school and even A League and International venues across the South Pacific. Now, the second generation design is available.

Building on the excellent reputation on the original design, the new system has a new extrusion, retains fully welded corners for maximum strength and durability, and a single length crossbar for rigidity and OHS reasons (eliminating pinch points).

The new version also includes a new locking net hook system. Designed to be operated with only a standard 10 or 20c coin, the system locks the net into place so it can never accidentally spring loose. The system is still fully enclosed within the profile as before to minimise risk of injury to users.

Goals feature regulation white powder-coated finish and free hanging "box" net supports. Additional ground sleeves and a ground net frame are also available and recommended.
