

Aluline Multisport Posts

The revolutionary Aluline Multisport Games posts give you access to multiple separate games from just one pair of posts. You can use them for:

Badminton - Fistball— Newcombeball - Sepak Takraw —Tennis - Volleyball

Made from our custom Aluline powder coated sports extrusion, these posts are light weight, easy to handle, stronger than steel and will not rust.

With multiple net height adjustment through the sliding collar system, and a easy glide nylon pulley to allow the net cable to smoothly flow onto the winch meaning you can fully tension all nets as required.

The posts have protective stoppers top and bottom to ensure that there are no sharp edges to hurt the installer or damage the sports floor.

The posts are designed for a standard sleeve installation, but can be adapted to fit most existing sleeves or used as a bolt down system.

Aluline Multisport post's flexibility allows easier set and strike, do not break safe handling rules (steel posts can weigh over 25 kg and may require 2 people to move safely) reduces the number of sleeves, and the storage requirements for any facility.

Product Code: - VBAL

Rev 2.0—20.8.10
