

Essentials Basketball System

AFFORDABLE SAFETY, **STRENGTH AND STABILITY**

The Essentials Basketball system is designed for every day heavy duty environments such as schools, parks and other institutions. It's a cost effective system, but engineered for maximum strength and outstanding durability.

Made from 115 mm galvanised steel, the system includes a full size 40 mm thick fibreglass backboard with full ribbing for long life and outstanding rebound consistency. No more dead spots, or delaminating or warping like a timber board.

The Essentials system is fitted with a heavy duty goal, which has continuous wrap no-tie net hooks instead of segmented sections for safety.

For the installers, the backboard is adjustable, so you can have flexibility in the installation of the post, saving you time and effort. You just attach the extension arms at the appropriate height.

The standard system has a 1500 mm projection, and is made for direct burial installation.
