

Stadia Multi-sport Posts

The Stadia multipurpose post system is a high quality and easy to handle all in one system catering for multiple sports off the one sports post.

The upright posts are made from high tensile aluminium and weigh only 11 kg per post for ease of handling. They have a gray anodized finish and are designed to easily slip into ground sleeves

Net heights are adjusted by sliding aluminium adjustable rails to desired net height and locking rails in place with wedge type locking mechanism. Adjustable rails slide the full length of the post to allow multiple sports such as Volleyball, Fistball, Badminton, Newcombeball, Sepak Takraw and Tennis. The posts have high impact plastic caps on ends for floor protection.

The net tensioner incorporates a heavy duty, self-locking ratchet mechanism with a compression clutch brake type release. A high tensile nylon strap will be used with the winch to achieve required net tension.

Supplied as a kit complete with Nets and post padding.

Product Code: VBSTADIA
